

## Syllabus for CSE015-01: Discrete Mathematics

Fall 2019

Instructor: Shawn Newsam

<b>Designation:</b>	Discrete Mathematics
<b>Catalog Description:</b>	Covers the basic concepts of discrete mathematics used in computer science and other disciplines that involve formal reasoning. The topics include logic, proofs, counting, set theory, algorithms, and number theory.
<b>Text Books and Other Required Materials:</b>	No text is required.
<b>Course Objectives/ Student Learning Outcomes:</b>	<p>This course will cover five major themes:</p> <ol style="list-style-type: none"><li>1. Mathematical reasoning: Students are expected to use mathematical reasoning in order to read, comprehend, and construct mathematical arguments. Students will learn basic concepts of mathematical logic and proof.</li><li>2. Combinatorial analysis: Students will count or enumerate objects and perform combinatorial analysis.</li><li>3. Discrete structures: Students will learn the basic concepts of sets, permutations, relations, graphs, trees and finite state machines. Students will represent discrete objects and relationships using abstract mathematical structures.</li><li>4. Algorithmic thinking: Students will verify whether an algorithm works well and perform analysis in terms of memory and time.</li><li>5. Applications and modeling: Discrete mathematics has been used in numerous applications. Students will formulate and model problems with the concepts and techniques of discrete mathematics.</li></ol> <p>Student Learning Outcomes:</p> <p>A. An ability to apply knowledge of computing and mathematics appropriate to the discipline.</p>
<b>Program Learning Outcomes:</b>	
<b>Prerequisites by Topic:</b>	
<b>Course Policies:</b>	
<b>Academic Dishonesty Statement:</b>	<ol style="list-style-type: none"><li>a. Each student in this course is expected to abide by the University of California, Merced's Academic Honesty Policy. Any work submitted by a student in this course for academic credit will be the student's own work.</li><li>b. You are encouraged to study together and to discuss information and concepts covered in lecture and the sections with other students. You can give "consulting" help to or receive "consulting" help from such students. However, this permissible cooperation should never involve one student having possession of a copy of all or part of work done by someone else, in the form of an e mail, an e mail attachment file, a diskette, or a hard copy. Should copying occur, both the student who copied work from another student and the student who gave material to be copied will both automatically receive a zero for the assignment. Penalty for violation of this Policy can also be extended to include failure of the course and</li></ol>

<b>Designation:</b>	Discrete Mathematics University disciplinary action. c. During examinations, you must do your own work. Talking or discussion is not permitted during the examinations, nor may you compare papers, copy from others, or collaborate in any way. Any collaborative behavior during the examinations will result in failure of the exam, and may lead to failure of the course and University disciplinary action.
<b>Disability Statement:</b>	Accommodations for Students with Disabilities: The University of California Merced is committed to ensuring equal academic opportunities and inclusion for students with disabilities based on the principles of independent living, accessible universal design and diversity. I am available to discuss appropriate academic accommodations that may be required for student with disabilities. Requests for academic accommodations are to be made during the first three weeks of the semester, except for unusual circumstances. Students are encouraged to register with Disability Services Center to verify their eligibility for appropriate accommodations.
<b>Topics:</b>	<ul style="list-style-type: none"> <li>- Propositional logic</li> <li>- Predicate logic</li> <li>- Inference and proofs</li> <li>- Sets</li> <li>- Functions</li> <li>- Sequences and series</li> <li>- Technical proof methods</li> <li>- Recursion and trees</li> <li>- Basic counting</li> <li>- Permutations and combinations</li> <li>- Recurrence</li> </ul>
<b>Class/laboratory Schedule:</b>	LECT MW 6:00-7:15pm; LAB M 1:30-4:20pm; M 7:30-10:20pm; W 7:30-10:20am; W 10:30-1:20pm; W 1:30-4:20pm; W 7:30-10:20pm; R 7:30-10:20pm; F 7:30-10:20am; F 10:30-1:20pm; F 1:30-4:20pm
<b>Midterm/Final Exam Schedule:</b>	
<b>Course Calendar:</b>	
<b>Professional Component:</b>	
<b>Assessment/Grading Policy:</b>	Homework: 20% Lab Assignments: 20% Quizzes: 40% Final Exam: 20%
